Supplemental Information

Not available

Section 03 Composition / Information on Ingredients

Hazardous Ingredients:

Chemical name Common name(s) **CAS** number Concentration (w/w%)

Hydrogen peroxide Hydrogen peroxide 7722-84-1 8-20%

Section 04 First-Aid Measures

Description of necessary first-aid measures

Inhalation Get medical advice / attention if you feel unwell or are concerned.

Ingestion Get medical advice / attention if you feel unwell or are concerned.

Skin Rinse skin with lukewarm, gently flowing water / shower for 5 minutes or until product is removed. If skin

contact irritation occurs or if you feel unwell: Get medical advice / attention.

Eye Remove source of exposure or move person to fresh air. Rinse eyes cautiously with lukewarm, gently flowing contact water for several minutes, while holding the eyelids open. Remove contact lenses, if present and easy to do.

Continue rinsing for 30 minutes. Take care not to rinse contaminated water into the unaffected eye or onto the

face. Immediately call a POISON CENTER or doctor.

Most important symptoms and effects, both acute and delayed

Inhalation May cause respiratory irritation. May cause discomfort or nausea. Ingestion Skin contact Causes transient skin irritation. Eve contact Causes serious eye damage.

Further information For further information see Section 11 Toxicological Information.

Section 05 Fire Fighting Measures

Suitable extinguishing media Extinguish fire using extinguishing agents suitable for the surrounding fire.

Unsuitable extinguishing

media

Water jets are not recommended in fires involving chemicals.

Specific hazards arising from Not available

the chemical

for fire-fighters

Special protective equipment Wear NIOSH-approved self-contained breathing apparatus and chemical-protective

clothing.

Customer Service: 800.387.7503 www.cleartech.ca Emergency: 306.664.2522 Revision Date: June 19, 2020

Section 06 Accidental Release Measures

Personal Precautions / **Protective Equipment / Emergency Procedures** Wear appropriate personal protective equipment (See Section 08 Exposure Controls and Personal Protection). Stay upwind, ventilate area.

Environmental Precautions

Prevent material from entering waterways, sewers or confined spaces. Notify local health and wildlife officials. Notify operators of nearby water intakes.

Methods and Materials for Containment and Cleaning Up

SMALL SPILLS: Stop or reduce leak if safe to do so. Clean up spill with non-reactive absorbent and place in suitable, covered, labeled containers. Flush area with water. Contaminated absorbent material may pose the same hazards as the spilled product. Use

vented containers to avoid pressure buildup.

LARGE SPILLS: Contact fire and emergency services and supplier for advice.

Section 07 Handling and Storage

Precautions for Safe Handling Use proper equipment for lifting and transporting all containers. Use sensible industrial

hygiene and housekeeping practices. Wash thoroughly after handling. Avoid all situations

that could lead to harmful exposure.

Inspect containers for damage or leaks before handling. If the original label is damaged or missing replace with a workplace label. Have suitable emergency equipment for fires, spills

and leaks readily available.

Never return contaminated material to its original container.

Conditions for Safe Storage Store in a cool, dry, well-ventilated area, out of direct sunlight, away from heat sources and

> incompatible materials. Always store in original labeled container. Keep containers tightly closed when not in use and when empty. Empty containers may contain hazardous

residues. Protect label and keep it visible.

Incompatibilities Bases, such as potassium hydroxide, sodium hydroxide, calcium hydroxide (slaked lime),

ammonia, carbonates.

Reducing agents, such as hydrogen, sodium borohydride, sulphur dioxide, thiosulphates,

hydrazine, phosphites, carbon, and oxalic, formic and ascorbic acid.

Organic material, such as wood, paper, gasoline, diesel, solvents and some glycol based

heat transfer fluids

Metals, such as aluminum, steel, and brass.

Section 08 Exposure Controls and Personal Protection

Exposure limits

Regulation Component Type of listing Value Hydrogen Peroxide **ACGIH TWA** 1 ppm

Engineering controls

Ventilation Requirements Mechanical ventilation (dilution or local exhaust), process or personnel enclosure and

control of process conditions should be provided in accordance with all fire codes and regulatory requirements. Supply sufficient replacement air to make up for air removed by

exhaust systems.

Other A soak hose and eyewash station or emergency shower and eyewash station should be

available, tested, and be in close proximity to the product being handled in accordance with

provincial regulations.

Protective equipment

Customer Service: 800.387.7503 www.cleartech.ca Emergency: 306.664.2522 Revision Date: June 19, 2020

Page 3 of 8

The following are recommendations only. It is the responsibility of the employer / user to conduct a hazard assessment of the process in which this product being used and determine the proper engineering controls and PPE for their process. Additional regulatory and safety information should be sought from local authorities and, if needed, a professional industrial hygienist.

Eye and face protection Where there is potential eye or face exposure, tightly fitting safety goggles and a face shield

or a full face respirator or similar protective equipment which protects the wearer's face and eyes are recommended. Contact lenses are not recommended; they may contribute to

severe eye injury.

Hand and body protection

Respiratory protection

Where handling this product it is recommended that skin contact is avoided.

In case of insufficient ventilation wear suitable respiratory equipment.

NIOSH respirator recommendations for: Hydrogen peroxide

Up to: 10 ppm

(APF = 10) Any supplied-air respirator

Up to: 25 ppm

(APF = 25) Any supplied-air respirator operated in a continuous-flow mode

Up to: 50 ppm

(APF = 50) Any self-contained breathing apparatus with a full facepiece.

(APF = 50) Any supplied-air respirator with a full facepiece

Up to: 75 ppm

(APF = 2000) Any supplied-air respirator that has a full facepiece and is operated in a pressure-demand or other positive-pressure mode

Emergency or planned entry into unknown concentrations or IDLH conditions:

(APF = 10,000) Any self-contained breathing apparatus that has a full facepiece and is operated in a pressure-demand or other positive-pressure mode

(APF = 10,000) Any supplied-air respirator that has a full facepiece and is operated in a pressure-demand or other positive-pressure mode in combination with an auxiliary selfcontained positive-pressure breathing apparatus

Escape:

(APF = 50) Any air-purifying, full-facepiece respirator (gas mask) with a chin-style, front- or

back-mounted canister providing protection against Hydrogen peroxide

Thermal hazards Not available

octanol/water

Log Pow = -0.70 to -1.33

Auto-ignition temperature Not applicable

Decomposition temperature 150-152 °C (Pure Hydrogen Peroxide)

Viscosity Not available

Specific gravity 1.034 g/mL (10% @ 20 °C)

Formula H₂O₂
Molecular weight 34.02 g/mol

Section 10 Stability and Reactivity

ReactivityThis product is an oxidizer and will react with reducing agents and organic compounds such

as paper or wood to produce heat and could potentially catch fire.

Stability This product is stable if stored according to the recommendations in Section 07. Exposure

to sunlight or high temperatures may cause the degradation of this product over time.

Possibility of hazardous

reactions

Not available

Conditions to avoid Avoid contact with incompatible materials. Do not heat.

Incompatible materials Bases, such as potassium hydroxide, sodium hydroxide, calcium hydroxide (slaked lime),

ammonia, carbonates.

Reducing agents, such as hydrogen, sodium borohydride, sulphur dioxide, thiosulphates,

hydrazine, phosphites, carbon, and oxalic, formic and ascorbic acid.

Organic material, such as wood, paper, gasoline, diesel, solvents and some glycol based

heat transfer fluids

Metals, such as aluminum, steel, and brass.

Safety Data Sheet

Toxic Health Effect Summary

Chemical

Strong oxidizizer.

characteristics

Skin Causes transient skin irritation. Ingestion May cause discomfort or nausea. Inhalation May cause respiratory irritation. Eye contact Causes serious eye damage.

Sensitization This product and its components at their listed concentration have no known sensitizing effects. Mutagenicity This product and its components at their listed concentration have no known mutagenic effects.

Carcinogenicity

IARC has classified hydrogen peroxide as group 3, not classifiable as to its carcinogenicity to humans.

Reproductive toxicity

This product and its components at their listed concentration have no known reproductive effects.

Specific organ

toxicity

This product and its components at their listed concentration have no known effects on specific

organs.

Aspiration hazard

Not available

Synergistic materials

Increased airways resistance was observed in volunteers exposed to hydrogen peroxide and sulfur dioxide aerosols at the same time. An animal study has shown that concurrent inhalation exposure to fine particulates and hydrogen peroxide can increase the toxicity of both to the lungs. Exposure to hydrogen peroxide also increased the toxicity of ozone in animals.

Section 12 Ecological Information

Ecotoxicity

Component	Type	Species	Value	Exposure Time
Hydrogen peroxide	LC50	Pimephales promelas	16.4 mg/L	72 hours
	EC50	Daphnia pulex	2.4 mg/L	48 hours
	NOEC	Skeletonema costatum	0.68 mg/L	48 hours

Biodegradability The domestic substance list categorizes hydrogen peroxide as persistent.

Bioaccumulation The domestic substance list categorizes hydrogen peroxide as non-bioaccumulative.

Mobility This product is water soluble, is not predicted to adsorb to soil and may contaminate ground

water.

Other adverse effects Not available

Section 13 Disposal Considerations

Waste From Residues /

Unused Products

Dispose in accordance with all federal, provincial, and local regulations including the

Canadian Environmental Protection Act.

Contaminated Packaging Do not remove label, follow label warnings even after the container is empty. Empty containers should be recycled or disposed of at an approved waste handling facility.

Section 14 Transport Information

UN number UN2984

UN proper shipping name and description

Revision Date: June 19, 2020

HYDROGEN PEROXIDE, AQUEOUS SOLUTION

with not less than 8% but less than 20% hydrogen peroxide (stabilized as necessary)

Customer Service: 800.387.7503 www.cleartech.ca Emergency: 306.664.2522

Transport hazard class(es) 5.1 Packing group Ш **Excepted quantities** 5 L

Environmental hazards Not listed as a marine pollutant under Canadian TDG Regulations, schedule III.

No special provisions Special precautions Transport in bulk ERAP index: not available

MARPOL 73/78 and IBC Code:

Product name: Hydrogen peroxide solutions (over 8% but not over 60% by

Pollution category: Y

Hazards: the product is included in the Code because of both its safety

and pollution hazards.

Ship type: ship type 3

Tank type: integral gravity tank Tank vents: controlled venting

Tank environmental control: no special requirements under this Code

Temperature classes no requirements

Electrical equipment: Apparatus group no requirements

> Flash point non-flammable product

Gauging: closed gauging

Vapour detection: no special requirements under this Code Fire protection: no special requirements under this Code Emergency equipment no special requirements under this Code

Specific and operational 15.5.2, 15.18, 15.19.6

requirements

Additional information

Secure containers (full or empty) during shipment and ensure all caps, valves, or closures

are secured in the closed position.

TDG PRODUCT CLASSIFICATION: This product has been classified on the preparation date specified at section 16 of this SDS, for transportation in accordance with the requirements of part 2 of the Transportation of Dangerous Goods Regulations. If applicable, testing and published test data regarding the classification of this product are listed in the references at section 16 of this SDS.

Section 15 Regulatory Information.

NOTE: THE PRODUCT LISTED ON THIS SAFETY DATA SHEET HAS BEEN CLASSIFIED IN ACCORDANCE WITH THE HAZARD CRITERIA OF THE CANADIAN HAZARDOUS PRODUCTS REGULATIONS. THIS SAFETY DATA SHEET CONTAINS ALL INFORMATION REQUIRED BY THOSE REGULATIONS.

All components of this product appear on the domestic substance list.

Section 16 Other Information

Date of latest revision: June 19, 2020

Note: The responsibility to provide a safe workplace remains with the buyer / user. The buyer / user should consider the health hazards and safety information contained herein as a guide and should take those precautions required in an individual operation to instruct employees and develop work practice procedures for a safe work environment. The information contained herein is, to the best of our knowledge and belief, accurate. However, since the conditions of handling and use are beyond our control, we make no guarantee of results, and assume no liability for damages incurred by the use of this material. It is the responsibility of the buyer / user to comply with all applicable laws and regulations regarding handling, using, reselling and shipping this product.

Attention: Receiver of the chemical goods / SDS coordinator

As part of our commitment to the RDC Responsible Distribution® initiative, ClearTech Industries Inc. and its associated companies require, as a condition of sale, that you forward the attached Safety Data Sheet(s) to all affected employees, customers, and end-users. ClearTech will send any available supplementary handling, health, and safety information to you at

If you have any questions or concerns please call our customer service center.
