Section 01 Identification

Product Identifier
Potassium Permanganate 4% Solution

Other Means of Identification
Not available

Product Use and Restrictions on Use
Oxidizing and bleaching, disinfectant, deodorizer, removes iron from water, tanning, algaeicide, dye ingredient.

Initial Supplier Identifier
ClearTech Industries Inc
1500 Quebec Avenue
Saskatoon, SK. Canada
S7K 1V7

Phone: 800.387.7503
Fax: 888.281.8109
www.cleartech.ca

Section 02 Hazard Identification

Physical Hazards
This product does not qualify for any physical hazard class under WHMIS 2015

Health Hazards
Skin corrosion / irritation Category 2
Serious eye damage / eye irritation Category 2

Signal Word
Warning

Hazard Statements
H315 Causes skin irritation.
H319 Causes serious eye irritation.

Precautionary Statements

Prevention
P264 Wash affected body parts thoroughly after handling.
P280 Wear protective gloves, eye protection, face protection
**Response**

P303 P352 P332  IF ON SKIN (or hair): Wash with plenty of water. If skin irritation occurs: Get medical advice / attention. Take off contaminated clothing and wash it before reuse.

P305 P351 P338  IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice or attention.

**Hazards Not Otherwise Classified**

Not available

**Supplemental Information**

Not available

**Section 03 Composition / Information on Ingredients**

**Hazardous Ingredients:**

**Section 04 First-Aid Measures**

**Description of necessary first-aid measures**

**Inhalation**  Remove source of exposure or move person to fresh air and keep comfortable for breathing. Call a POISON CENTER or doctor if you feel unwell.

**Ingestion**  Rinse mouth. Get medical advice / attention if you feel unwell or are concerned.

**Skin contact**  Avoid direct contact. Wear chemical protective clothing, if necessary. Take off immediately contaminated clothing, shoes and leather goods. Rinse skin with lukewarm, gently flowing water / shower for 15 to 20 minutes. Get medical advice / attention. Wash contaminated clothing before re-use, or discard.

**Eye contact**  Remove source of exposure or move person to fresh air. Rinse eyes cautiously with lukewarm, gently flowing water for several minutes, while holding the eyelids open. Remove contact lenses, if present and easy to do. Continue rinsing for 15 to 20 minutes. Take care not to rinse contaminated water into the unaffected eye or onto the face. If eye irritation persists: Get medical advice / attention.

**Most important symptoms and effects, both acute and delayed**

**Inhalation**  May cause respiratory irritation.

**Ingestion**  May cause discomfort or nausea.

**Skin contact**  Causes skin irritation.

**Eye contact**  Causes serious eye irritation.

**Further information**  For further information see Section 11 Toxicological Information.

**Section 05 Fire Fighting Measures**

**Suitable extinguishing media**  Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.

**Unsuitable extinguishing media**  Do NOT use dry chemical fire extinguishing agents containing ammonium compounds (such as some A:B:C agents), since an explosive compound can be formed.

**Specific hazards arising from the chemical**  In the event of a fire oxides of potassium and manganese, and formic acid may be released.

**Special protective equipment for fire-fighters**  Wear NIOSH-approved self-contained breathing apparatus and chemical-protective clothing.
Section 06 Accidental Release Measures

Personal Precautions / Protective Equipment / Emergency Procedures
Wear appropriate personal protective equipment (See Section 08 Exposure Controls and Personal Protection). Stay upwind, ventilate area.

Environmental Precautions
Prevent material from entering waterways, sewers or confined spaces. Notify local health and wildlife officials. Notify operators of nearby water intakes.

Methods and Materials for Containment and Cleaning Up
SMALL SPILLS: Stop or reduce leak if safe to do so. Clean up spill with non-reactive absorbent and place in suitable, covered, labeled containers. Flush area with water. Contaminated absorbent material may pose the same hazards as the spilled product. LARGE SPILLS: Contact fire and emergency services and supplier for advice.

Section 07 Handling and Storage

Precautions for Safe Handling
Use proper equipment for lifting and transporting all containers. Use sensible industrial hygiene and housekeeping practices. Wash thoroughly after handling. Avoid all situations that could lead to harmful exposure.

Inspect containers for damage or leaks before handling. If the original label is damaged or missing replace with a workplace label. Have suitable emergency equipment for fires, spills and leaks readily available.

Conditions for Safe Storage
Store in a cool, dry, well-ventilated area, out of direct sunlight, away from heat sources and incompatible materials. Always store in original labeled container. Keep containers tightly closed when not in use and when empty. Empty containers may contain hazardous residues. Protect label and keep it visible.

Incompatibilities
Acids, such as sulphuric, nitric, hydrochloric, phosphoric, fluorsilicic (HFSA), sulphonic, acetic, citric, oxalic, and formic.

Reducing agents, such as hydrogen, sodium borohydride, sulphur dioxide, thiosulphates, hydrazine, phosphites, carbon, and oxalic, formic and ascorbic acid.
Powdered zinc and copper.

Section 08 Exposure Controls and Personal Protection

Exposure limits

Engineering controls

Ventilation Requirements
Mechanical ventilation (dilution or local exhaust), process or personnel enclosure and control of process conditions should be provided in accordance with all fire codes and regulatory requirements. Supply sufficient replacement air to make up for air removed by exhaust systems.

Other
A soak hose and eyewash station or emergency shower and eyewash station should be available, tested, and be in close proximity to the product being handled in accordance with provincial regulations.

Protective equipment

The following are recommendations only. It is the responsibility of the employer / user to conduct a hazard assessment of the process in which this product being used and determine the proper engineering controls and PPE for their process. Additional regulatory and safety information should be sought from local authorities and, if needed, a professional industrial hygienist.
Eye and face protection
Where there is potential eye or face exposure, tightly fitting chemical goggles are recommended. Contact lenses are not recommended; they may contribute to severe eye injury.

Hand and body protection
Disposable latex or nitrile gloves are recommended to prevent incidental contact. Butyl rubber, neoprene, or PVC skin protection is recommended for extended contact. Leather gloves are not recommended for chemical protection. Refer to manufacturer’s specifications for breakthrough times and permeability information; note that breakthrough times and permeability vary with temperature, application and age of material. Continued use of contaminated safety gear or clothing is not recommended; wash before reuse or discard.

Respiratory protection
In case of insufficient ventilation wear suitable respiratory equipment.

Thermal hazards
Not available

Section 10 Stability and Reactivity

Reactivity
This product is an oxidizer and will react with reducing agents and organic compounds such as paper or wood to produce heat and could potentially catch fire.

Stability
This product is stable if stored according to the recommendations in Section 07.

Possibility of hazardous reactions
Hazardous polymerization will not occur.

Conditions to avoid
Avoid contact with incompatible materials. Do not heat.

Incompatible materials
Acids, such as sulphuric, nitric, hydrochloric, phosphoric, flurosilicic (HFSA), sulphonic, acetic, citric, oxalic, and formic.
Reducing agents, such as hydrogen, sodium borohydride, sulphur dioxide, thiosulphates, hydrazine, phosphites, carbon, and oxalic, formic and ascorbic acid.
Powdered zinc and copper.

Hazardous decomposition products
Thermal decomposition may produce oxides of potassium and manganese, and formic acid.

Section 11 Toxicological Information

Toxic Health Effect Summary

Chemical characteristics
Permanganate salts are strong oxidizing agents.

Skin
Causes skin irritation.

Ingestion
May cause discomfort or nausea.

Inhalation
May cause respiratory irritation.

Eye contact
Causes serious eye irritation.

Sensitization
This product and its components at their listed concentration have no known sensitizing effects.

Mutagenicity
This product and its components at their listed concentration have no known mutagenic effects.

Carcinogenicity
This product and its components at their listed concentration have no known carcinogenic effects.

Reproductive toxicity
This product and its components at their listed concentration have no known reproductive effects.

Specific organ toxicity
This product and its components at their listed concentration have no known effects on specific organs.

Aspiration hazard
Not available

Synergistic materials
Not available

### Biodegradability
- The domestic substance list categorizes potassium permanganate as non-persistent.

### Bioaccumulation
- The domestic substance list categorizes potassium permanganate as non-bioaccumulative.

### Mobility
- This product is water soluble, is not predicted to adsorb to soil and may contaminate ground water.

### Other adverse effects
- The domestic substance list categorizes potassium permanganate as inherently toxic to aquatic organisms.

### Section 13 Disposal Considerations

#### Waste From Residues / Unused Products
- Dispose in accordance with all federal, provincial, and local regulations including the Canadian Environmental Protection Act.

#### Contaminated Packaging
- Do not remove label, follow label warnings even after the container is empty. Empty containers should be recycled or disposed of at an approved waste handling facility.

### Section 14 Transport Information

#### UN number
- Not available

#### UN proper shipping name and description
- Not available

#### Transport hazard class(es)
- Not available

#### Packing group
- Not available

#### Excepted quantities
- Not available

#### Environmental hazards
- Not listed as a marine pollutant under Canadian TDG Regulations, schedule III.

#### Special precautions
- No special provisions

#### Transport in bulk
- ERAP index: not available
  - MARPOL 73/78 and IBC Code:
    - This product is not listed in Chapter 17 of the IBC Code.

#### Additional information
- Secure containers (full or empty) during shipment and ensure all caps, valves, or closures are secured in the closed position.

### TDG PRODUCT CLASSIFICATION:
- This product has been classified on the preparation date specified at section 16 of this SDS, for transportation in accordance with the requirements of part 2 of the Transportation of Dangerous Goods Regulations. If applicable, testing and published test data regarding the classification of this product are listed in the references at section 16 of this SDS.

### Section 15 Regulatory Information

**NOTE:** THE PRODUCT LISTED ON THIS SAFETY DATA SHEET HAS BEEN CLASSIFIED IN ACCORDANCE WITH THE HAZARD CRITERIA OF THE CANADIAN HAZARDOUS PRODUCTS REGULATIONS. THIS SAFETY DATA SHEET CONTAINS ALL INFORMATION REQUIRED BY THOSE REGULATIONS.

All components of this product appear on the domestic substance list.

Manganes (and its compounds) is listed in the National Pollutant Release Inventory (NPRI). Reporting threshold: 10 tonnes manufactured, processed or otherwise used.
Section 16 Other Information

Date of latest revision: September 26, 2019

Note: The responsibility to provide a safe workplace remains with the buyer / user. The buyer / user should consider the health hazards and safety information contained herein as a guide and should take those precautions required in an individual operation to instruct employees and develop work practice procedures for a safe work environment. The information contained herein is, to the best of our knowledge and belief, accurate. However, since the conditions of handling and use are beyond our control, we make no guarantee of results, and assume no liability for damages incurred by the use of this material. It is the responsibility of the buyer / user to comply with all applicable laws and regulations regarding handling, using, reselling and shipping this product.

Attention: Receiver of the chemical goods / SDS coordinator

As part of our commitment to the RDC Responsible Distribution® initiative, ClearTech Industries Inc. and its associated companies require, as a condition of sale, that you forward the attached Safety Data Sheet(s) to all affected employees, customers, and end-users. ClearTech will send any available supplementary handling, health, and safety information to you at your request.
If you have any questions or concerns please call our customer service center.
